SAMBUTAN KETUA PENGURUS YAYASAN URDI

WELCOME SPEECH FROM CHAIRMAN OF URDI FOUNDATION MANAGEMENT BOARD

Dr. Ir. Wicaksono Sarosa

URDI berupaya terus membangun perannya untuk dapat menjadi pionir dalam bidang riset dan pengetahuan. Sejak URDI didirikan, berbagai program penelitian dan kerja sama lembaga terus dilaksanakan bersama dengan para penggiat dan para ahli di bidangnya, baik dari dalam maupun luar negeri.

Kami berharap keberadaan URDI dapat membantu pihak-pihak yang berkepentingan pada khususnya dan masyarakat pada umumnya, serta mampu menjawab berbagai tantangan di dalam lingkup perkotaan dan perdesaan.

URDI strives to continue to build its role to become a pioneer in the field of research and knowledge. Since URDI was founded, various research programs and institutional collaborations have continued to be carried out together with activists and experts in their fields, both from within and outside the country.

We hope that the existence of URDI can help interested parties in particular and society in general, and be able to answer various challenges in urban and rural areas.

SAMBUTAN DIREKTUR EKSEKUTIF

WELCOME SPEECH FROM THE EXECUTIVE DIRECTOR

Bayu Wirawan, S.T., MT., M.Sc

URDI merupakan sebuah institusi non pemerintah yang selalu mengedepankan profesionalitas dan kualitas dengan tidak mengesampingkan nilai-nilai luhur, yang bergerak secara dinamis sejalan dengan perkembangan jaman.

URDI mempunyai pengalaman luas dalam melakukan kajian hulu-hilir dinamika kebijakan dengan pendekatan kapasitas yurisdiksi sub-nasional dan analisis geospasial yang berkontribusi mendukung pemerintah daerah dalam menilai potensi investasi publik daerah yang mempertimbangkan sosio-ekologi perkotaan dan regional, perubahan iklim dan bencana, serta konflik spasial untuk menciptakan keadilan, inklusif dan pembangunan berkelanjutan.

Kami harap URDI dapat terus berkontribusi dalam pembangunan perkotaan dan daerah di Indonesia.

URDI is a non-governmental institution that always prioritizes professionalism and quality without ignoring noble values, which moves dynamically in line with current developments.

URDI has extensive experience in conducting upstream-downstream studies of policy dynamics using a sub-national jurisdictional capacity approach and geospatial analysis which contributes to supporting local governments in assessing regional public investment potential that takes into account urban and regional socio-ecology, climate change and disasters, and spatial conflicts to create justice, inclusiveness and sustainable development.

We do hope that URDI can continuously contribute in urban and regional development in Indonesia.

Albert Szent-Gyorgyi

TENTANG URDI

ABOUT URDI

Urban and Regional Development Institute (URDI) adalah organisasi nirlaba independen yang bertujuan untuk mempromosikan pembangunan perkotaan dan regional yang berkelanjutan di Indonesia. Lembaga ini memiliki organisasi inti yang relatif kecil dan pada saat yang sama terus mengembangkan jaringan organisasi yang luas.

Lembaga ini telah bekerja sama dengan berbagai mitra mulai dari pemerintah daerah hingga pemerintah pusat, sektor swasta, dan berbagai lembaga internasional. Lembaga ini secara konsisten berupaya mendukung peningkatan kapasitas lokal melalui program pelatihan dengan menggunakan pendekatan inovatif.

LATAR BELAKANG

Pembangunan perkotaan dan regional di Indonesia telah lama ditandai dengan semakin lebarnya kesenjangan antara kebijakan yang bertujuan baik dan tindakan yang dilaksanakan secara buruk, antara penelitian yang ekstensif dan praktik yang tidak terintegrasi, antara apa yang sebenarnya dibutuhkan dan apa yang sebenarnya disediakan. Ada juga perbedaan kepentingan yang besar di antara para pemangku kepentingan dalam pembangunan daerah yang terus menerus mengancam terhambatnya pembangunan.

Urban and Regional Development Institute (URDI) is an independent not-for-profit organization aimed at promoting sustainable urban and regional development in Indonesia. The institute maintains a relatively small core organization while at the same time continuously developing an expansive networking organization.

The institute has worked with a wide range of partners from local government to national government, private sectors, and various international agencies. The institute consistently supports local capacity building through training programs using innovative approaches.

HISTORY

Urban and regional development in Indonesia has long been characterized by widening gaps between well-intentioned policies and poorly implemented actions, between extensive research and unintegrated practice, and between what is needed and what is provided. There has also been a considerable divergence of interests among the stakeholders in local development that continuously threatens to put the development on the brakes.

Situasi seperti ini diperparah oleh tren urbanisasi yang meningkat pesat, globalisasi ekonomi dan sosial-budaya, desentralisasi kekuasaan, demokratisasi pemerintahan, privatisasi yang meluas dan sejenisnya. Terbatasnya dan tidak meratanya alokasi sumber daya alam, sosial, keuangan, fisik dan manusia antar daerah di Indonesia menjadikan tugas peningkatan kesejahteraan masyarakat melalui pembangunan perkotaan dan daerah menjadi semakin menantang.

Berlatar belakang itulah **Yayasan Pengembangan Perkotaan dan Daerah atau Yayasan URDI** mendirikan lembaga independen ini pada bulan November 1995. Dengan misi tersebut, URDI didirikan dan terus didukung oleh pihak-pihak yang peduli dari berbagai sektor pembangunan perkotaan dan daerah. masyarakat yang mewakili pemerintah, swasta dan masyarakat. Sejak didirikan, lembaga ini terus berupaya menangani berbagai isu pembangunan perkotaan dan regional baik pada tingkat kebijakan maupun program peningkatan kapasitas.

Such a situation has been compounded by the current trends of rapidly increasing urbanization, economic as well as socio-cultural globalization, decentralization of authorities, democratization of governance, widespread privatization, and the like. The limited and unevenly allocated natural, social, financial, physical, and human resources among localities in Indonesia have made the task of improving the people's welfare through urban and regional development even more challenging.

*It is with such a backdrop that the **Yayasan Pengembangan Perkotaan dan Daerah or URDI Foundation** set up this independent institution in November 1995. With the aforesaid missions, URDI was founded and is continuously supported by concerned people from various segments of the urban and regional development community representing the government, private, and community sectors. Since its establishment, the institute continuously works on various urban and regional development issues both at the policy level and capacity building program.*

MISI

MISSION

RESEARCH

for various scientific disciplines related to urban and rural areas.

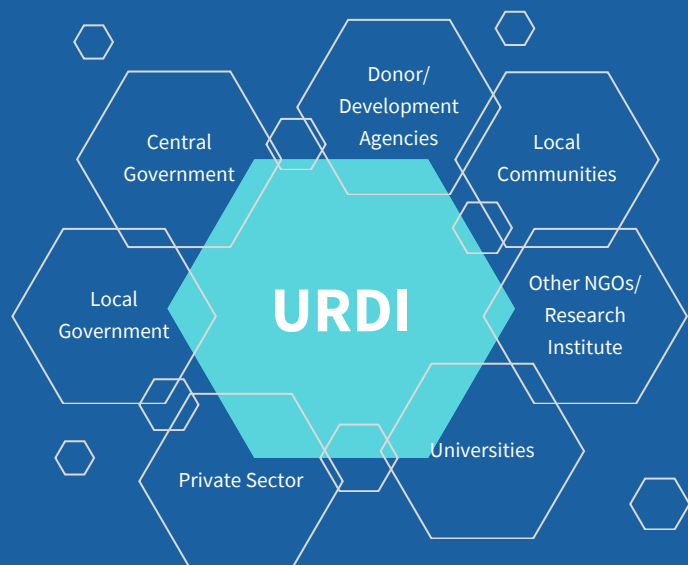

FORUM AND PUBLICATION

space for information dissemination together with experts and activists.

TRAINING

various subjects such as urban environmental management, community development, etc.

TUJUAN DAN AKSI STRATEGIS

STRATEGIC GOALS AND ACTIONS

“URDI mendukung penguatan posisi tawar pemerintah daerah untuk mengembangkan sinergi antara investasi publik dan investasi swasta dan asing dalam mewujudkan pembangunan yang adil, inklusif dan berkelanjutan.”

“URDI supports strengthening the local government's bargaining position to develop synergy between public investment and private and foreign investment in realizing equitable, inclusive and sustainable development.”

PENDIRI ORGANISASI

FOUNDER OF THE ORGANIZATION

Urban and Regional Development Institute (URDI) didirikan dan terus didukung oleh orang-orang peduli dari berbagai segmen komunitas pembangunan perkotaan dan daerah yang mewakili sektor pemerintah, swasta, dan masyarakat.

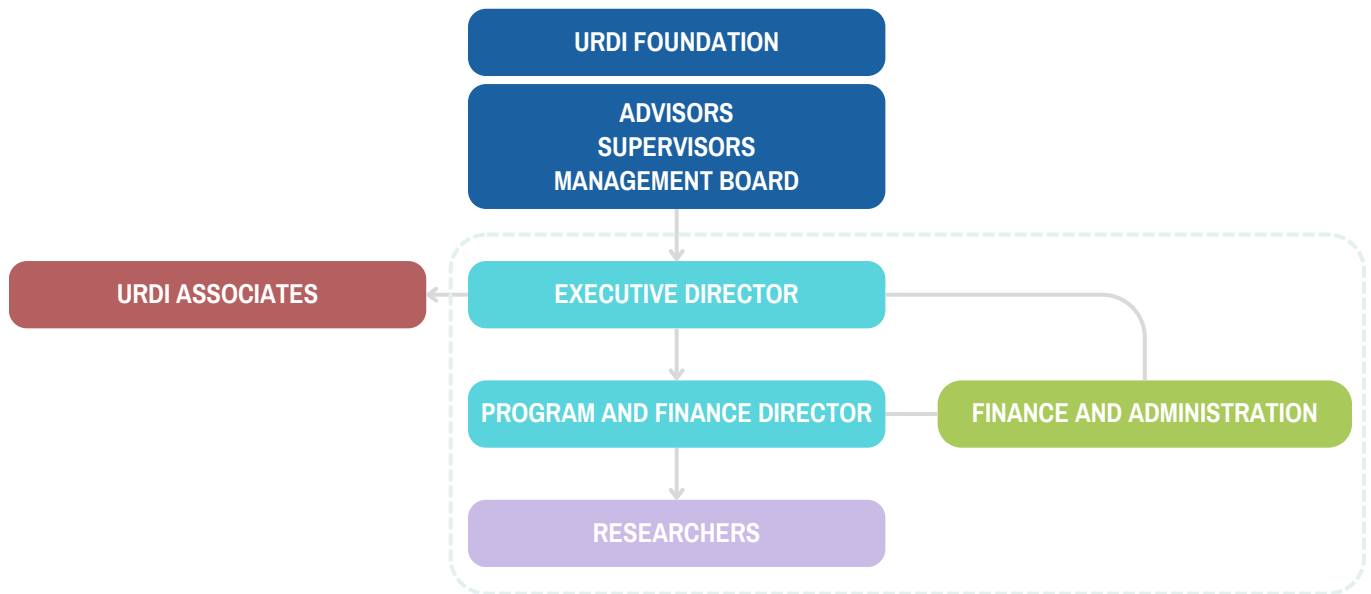

***Urban and Regional Development Institute (URDI)** was founded and is continuously supported by concerned people from various segments of the urban and regional development community representing the government, private, and community sectors.*

Bayu Wirawan
Executive Director

Seorang perencana kota dan wilayah yang memiliki spesialisasi dalam perencanaan tata ruang, manajemen kota, tata kelola kota dan pembangunan infrastruktur.

Memperoleh gelar ganda Master bidang Environmental and Infrastructure Planning dari University of Groningen, Belanda (2016) serta Master Perencanaan Wilayah dan Kota dari Institut Teknologi Bandung (2016), dan gelar Sarjana Perencanaan Wilayah dan Kota dari Institut Teknologi Bandung (2003).

An urban and regional planner by training, specializing in spatial planning, urban management, urban governance and infrastructure development.

Has received dual master degree on Environmental and Infrastructure Planning from University of Groningen, The Netherlands (2016) and Regional and City Planning from Institute of Technology Bandung (2016), and bachelor degree on Urban and Regional Planning from Institute of Technology Bandung (2003)

Ivo Setiono
Program and Finance Director

Seorang spesialis kebijakan publik, perencanaan sosial dan pembangunan, dengan fokus pada kebijakan publik, pembangunan perkotaan, perencanaan sosial dan pengembangan masyarakat.

Memperoleh gelar Master Development Practice (Advance) dari University of Queensland, Australia (2008) dan gelar Sarjana Kebijakan Publik dari Universitas Katolik Parahyangan Bandung pada tahun 1999.

A public policy, social planning and development specialist, focusing in public policy, urban development, social planning and community development.

Has received master degree on Development Practice (Advance) from University of Queensland, Australia (2008) and bachelor degree on public policy from Bandung's Catholic University of Parahyangan in 1999.

Muhammad Muhsin
Researcher

Seorang peneliti pengelolaan lingkungan dengan bidang keahliannya dalam perencanaan dan kebijakan lingkungan, dan pemodelan dinamika sistem.

Memperoleh gelar Magister Ilmu Lingkungan dari Universitas Indonesia (2018) dan gelar Sarjana Teknik Lingkungan dari Institut Teknologi Bandung (2011). Saat ini sedang menempuh pendidikan doktoral di bidang *System Engineering* di *University of New South Wales Canberra, Australia*.

An environmental management researcher with area of expertise in environmental planning and policy, and system dynamics modelling with more than ten years professional experiences.

Has received master degree on Environmental Science from University of Indonesia (2018) and bachelor degree on Environmental Engineering from Institute of Technology Bandung (2011). Currently pursuing his doctoral on System Engineering in University of New South Wales Canberra, Australia

Galuh Shita Ayu Bidari
Researcher

Seorang peneliti dengan pengalaman profesional di berbagai bidang seperti perencanaan wilayah dan kota, media komunikasi visual, pengembangan website, dan sebagainya.

Memperoleh gelar Sarjana Teknik Perencanaan Wilayah dan Kota dari Universitas Trisakti (2012).

A researcher with professional experience in various fields such as regional and city planning, visual communication media, website development, and so on.

Has received her Bachelor's degree in Urban and Regional Planning Engineering from Trisakti University (2008).

Rizal Imana
Researcher

Seorang peneliti perkotaan dan regional dengan spesialisasi keahlian dalam bidang sistem informasi geografis dan pemodelan spasial .

Meraih gelar Sarjana Perencanaan Wilayah dan Kota dari Universitas Trisakti, Jakarta (2017). Saat ini sedang menempuh pendidikan magister di bidang Pengelolaan Lingkungan Hidup dan Sumber Daya Alam di Institut Pertanian Bogor.

An urban and regional researcher specialized in geographic information system and spatial modeling.

Has received his Bachelor's degree on Urban and Regional Planning from Trisakti University, Jakarta (2017). Currently pursuing his master degree on Environment and Natural Resources Management in Bogor Agricultural University.

Shela Aulia Rahmadhani
Researcher

Peneliti muda ekonomi lingkungan yang berfokus pada bidang pengelolaan dan kebijakan terkait pengelolaan persampahan, pengembangan komunitas dan komunikasi media.

Memperoleh gelar Sarjana Ekonomi Sumber Daya dan Lingkungan dari Institut Pertanian Bogor (2022).

A junior environmental economics researcher who focuses on management and policy related to waste management, community development and media communication.

Has received her Bachelor's degree on Resources and Environmental Economics from Bogor Agriculture University (2022).

Adinda Amalia
Researcher

Peneliti muda yang berfokus pada bidang perencanaan wilayah dengan fokus kajian kebijakan spasial maupun non spasial.

Memperoleh gelar Sarjana Perencanaan Wilayah dan Kota dari Universitas Sebelas Maret Surakarta (2022).

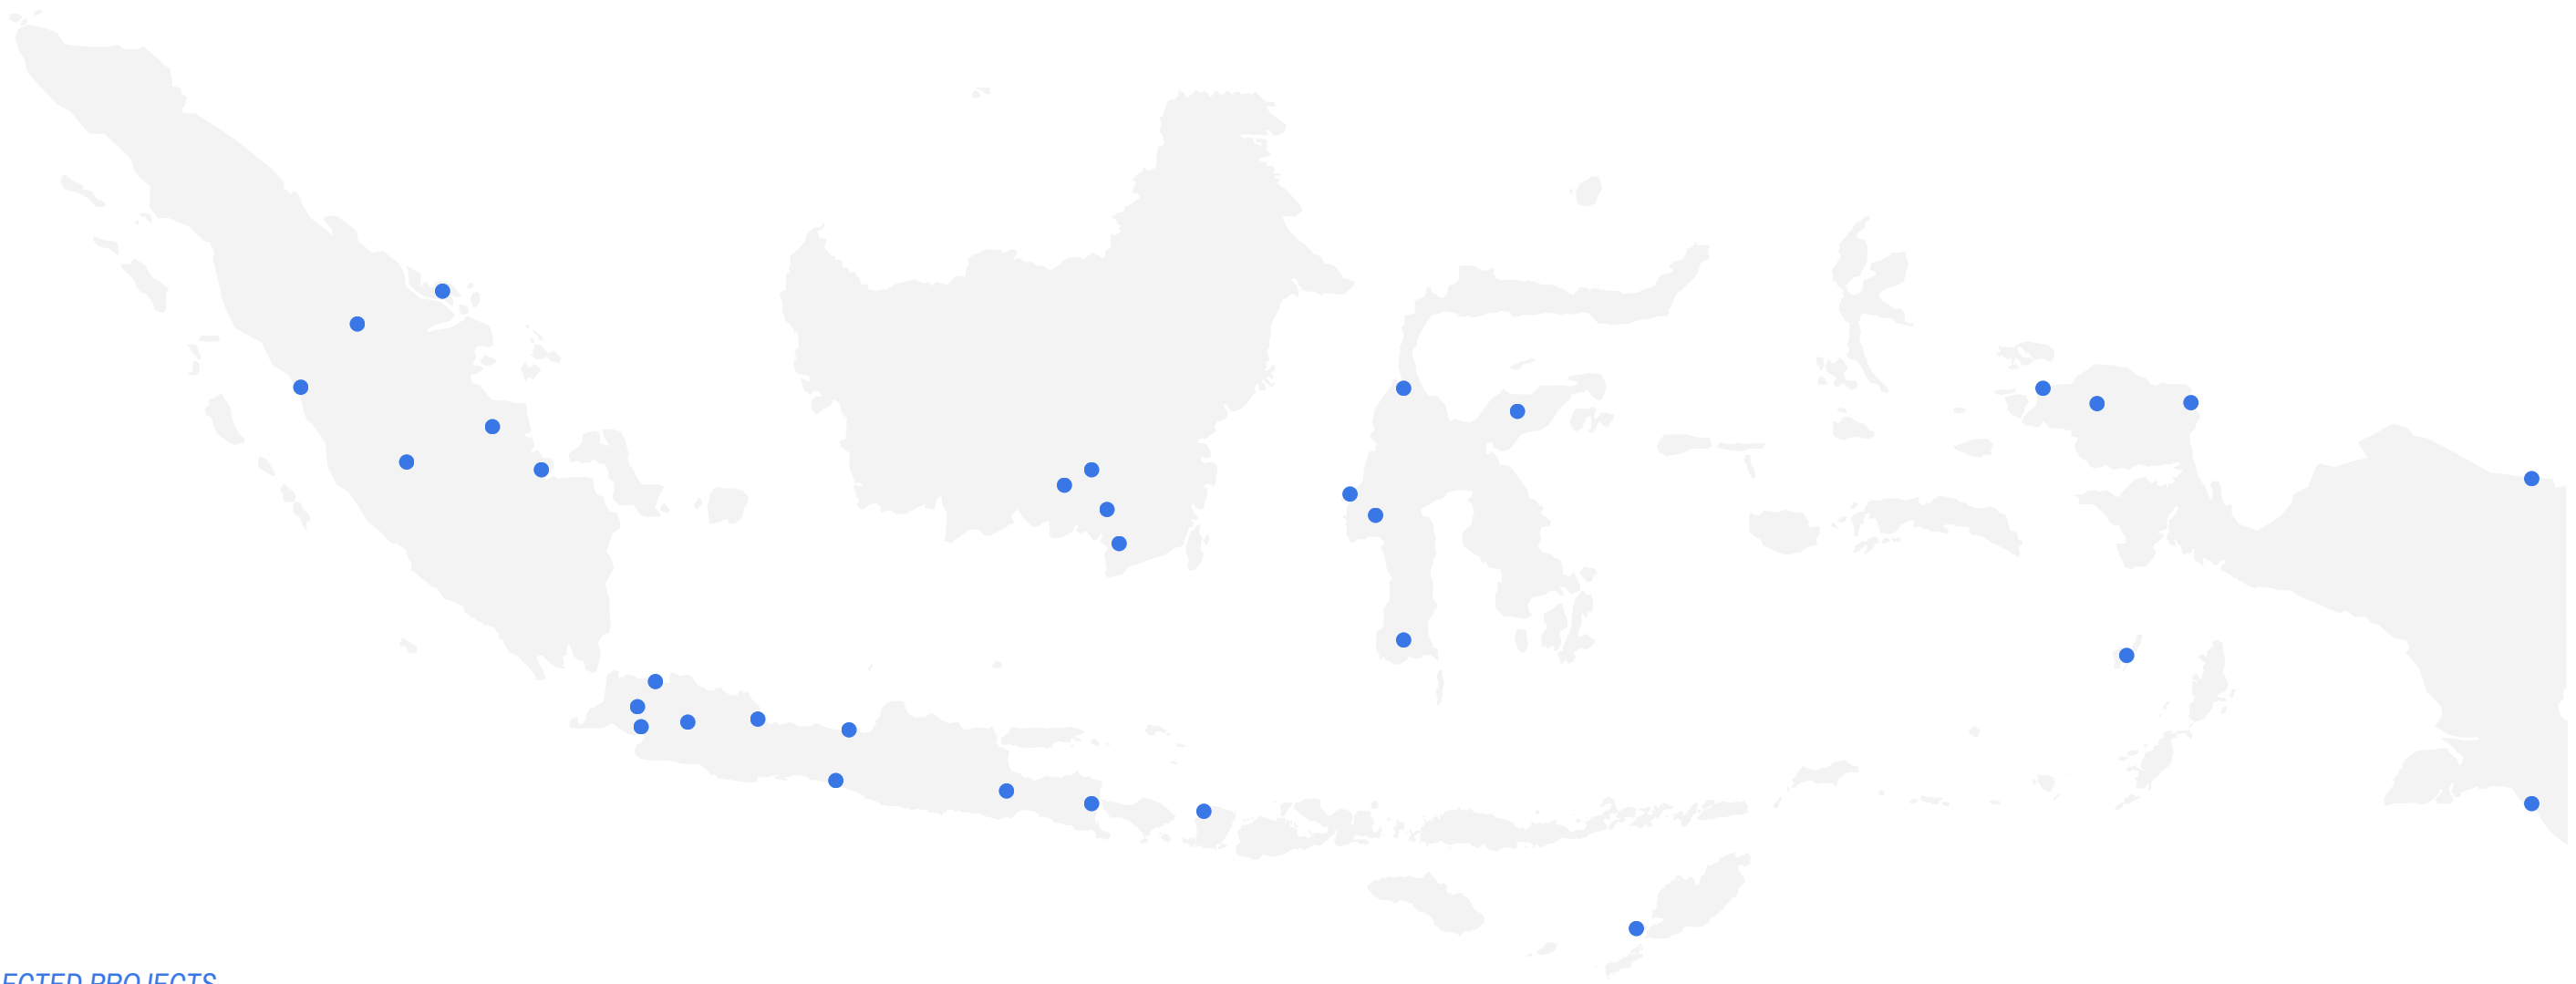

A junior researcher who focuses on the field of regional planning with a focus on spatial and non-spatial policy studies.

Has received her Bachelor's degree in Regional and City Planning from Sebelas Maret University, Surakarta (2022).

STRATEGIC POLICY FEEDING ROAD TO PARIS AND TRACEABILITY OF INDONESIA INDC

OCTOBER 2015 – JUNE 2016

Komitmen Indonesia untuk mendukung mengatasi dampak perubahan iklim tertuang pertama kali dalam dokumen NDC (Nationally Determined Contribution) pada tahun 2015. Dalam konteks ini, URDI telah mendukung penyusunan dokumen NDC tersebut dengan memberikan masukan-masukan strategis terkait penanganan perubahan iklim yang terutama terdampak oleh masifnya perubahan tata guna lahan Indonesia dari guna lahan konservasi menjadi guna lahan budidaya.

Indonesia's commitment to support overcoming the impacts of climate change was first stated in the NDC (Nationally Determined Contribution) document in 2015. In this context, URDI has supported the preparation of the NDC document by providing strategic input regarding handling climate change which is especially affected by massive changes. Indonesia's land use from conservation land use to cultivation land use.

EXPANDING COMMUNITY RIGHTS, LIVELIHOODS INNOVATION & REDD+ IN INDONESIA

APRIL 2021 - MARCH 2025

Indonesia masuk dalam daftar 10 besar negara penghasil emisi gas rumah kaca di dunia dan memiliki kemampuan besar dalam penyerapan karbon dan memberikan kesejahteraan.

PERMATA merupakan inisiatif yang bertujuan mendukung pengakuan hak-hak Masyarakat Adat dan Komunitas Lokal (MAKL) yang tinggal di dalam dan sekitar kawasan hutan untuk mendapatkan penghidupan berkelanjutan serta memperbaiki tata kelola sektor hutan dan lahan yang lestari dalam mengatasi masalah deforestasi dan degradasi hutan di Indonesia.

PERMATA bekerja di 6 kabupaten yang berada di wilayah Provinsi Papua (Kabupaten Jayapura dan Merauke), Provinsi Papua Barat (Kabupaten Tambrau dan Teluk Bintuni), Provinsi Kalimantan Utara (Kabupaten Malinau) dan Provinsi Kalimantan Barat (Kabupaten Kapuas Hulu).

Indonesia is included in the list of the top 10 greenhouse gas emitting countries in the world but has a great ability to absorb carbon and provide welfare for the customary community and their local communities.

PERMATA is an initiative that aims to support the recognition of the rights of Indigenous People and Local Communities (IPLC) who live in and around forest areas to obtain sustainable livelihoods and improve sustainable forest and land sector management in overcoming the problem of deforestation and forest degradation in Indonesia.

PERMATA works in 6 regencies located in Papua Province (Jayapura regency and Merauke regency), West Papua Province (Tambrau regency and Teluk Bintuni regency), North Kalimantan Province (Malinau regency) and West Kalimantan Province (Kapuas Hulu regency).

STUDY ON SPATIAL AND LAND USE PLANNING RELATED TO LAND AND NATURAL RESOURCE CONFLICT

SEPTEMBER 2017 – MARCH 2018

Investasi berbasis lahan skala besar di berbagai penjuru Indonesia berdampak pada timbulnya konflik terhadap penggunaan lahan dan sumber daya alam. Hasil dari kajian ini memperlihatkan bahwa walaupun kebijakan tata ruang sudah berupaya untuk mengatur pemanfaatan lahan berwawasan lingkungan, akan tetapi dalam pelaksanaannya masih tidak konsisten sehingga aturan tata ruang justru berdampak pada timbulnya permasalahan penggunaan lahan.

Large-scale land-based investments in various parts of Indonesia have resulted in conflicts over the use of land and natural resources. The results of this study showed despite spatial planning policies attempting to regulate sustainable land use, its implementation is still inconsistent thus the spatial plan inflicted the emergence of land use conflict.

LINKING POPULATION DYNAMICS & CLIMATE CHANGE ADAPTATION WITH DISASTER RISK REDUCTION

SEPTEMBER – DECEMBER 2014

Dinamika penduduk merupakan salah satu faktor utama yang perlu diperhatikan dalam menganalisis dampak perubahan iklim. Untuk meningkatkan kemungkinan terjadinya pembangunan berkelanjutan (khususnya perencanaan pembangunan nasional dan daerah) melalui keterkaitan secara sistematis isu-isu dinamika populasi, adaptasi perubahan iklim, dan pengurangan risiko bencana serta mengintegrasikan kedua konsep tersebut ke dalam semua tingkat proses pembangunan berkelanjutan.

Population dynamics is one of the main factors that need to be considered in analyzing the impacts of climate change. In order to increase the likelihood of sustainable development (more particularly national and sub-national development planning) through systematically linking issues of population dynamics, climate change adaptation, and disaster risk reduction and integrating both concepts into all levels of the sustainable development processes.

PEKERJAAN SERUPA SIMILAR PROJECTS

KABUPATEN MALANG POLICY AND GOVERNANCE STUDY ON WASTE MANAGEMENT

APRIL - AUGUST 2022

Pendanaan sistem persampahan yang tidak mencukupi, tata kelola yang tidak memadai, dan kurangnya kapasitas teknis untuk membangun dan mengoperasikan sistem persampahan secara berkelanjutan merupakan faktor utama yang mendasari rendahnya tingkat penanganan sampah di Indonesia.

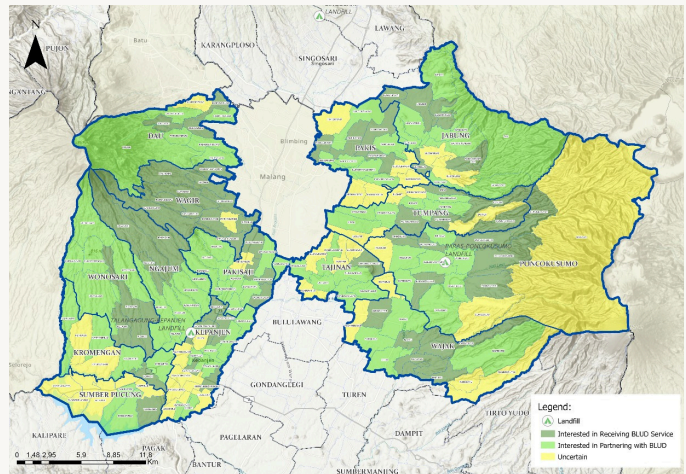

Gagasan utama dari studi ini adalah untuk meningkatkan pengelolaan sampah dengan membentuk lembaga-lembaga baru yang lebih kuat dan lebih gesit dan mandiri. Ide tersebut diwujudkan melalui penerapan Badan Pelayanan Unit Daerah (BLUD) dalam pengelolaan sampah di Kabupaten Malang.

Dalam rangka mendukung penyusunan strategi pengembangan BLUD Pelayanan Persampahan di Kabupaten Malang, URDI mencoba menelaah bagaimana kesiapan regulasi persampahan dan efektivitas pelaksanaannya, serta bagaimana persepsi para pemangku kepentingan kunci untuk mendukung sistem BLUD Pelayanan Persampahan di Kabupaten Malang.

Insufficient waste system funding, inadequate governance, and lack of technical capacity to build and operate waste systems in a sustainable manner are the main factors underlying the low level of waste handling in Indonesia.

The main idea of the study is to enhance waste management by installing a new strong institution that is more agile and independent. This idea is carried out by implementing Badan Layanan Unit Daerah (BLUD) on waste management in Malang Regency.

In order to support the preparation of a strategy for developing the Waste Service BLUD in Malang Regency, URDI is trying to examine how prepared waste preparation is and the effectiveness of its implementation, as well as the perceptions of stakeholders to support the Waste Service BLUD system in Malang Regency.

STRATEGIC ENVIRONMENTAL ASSESSMENT IN JAMBI AND WEST SULAWESI FOR GREEN PROSPERITY PROJECT PREPARATION

NOVEMBER 2012 – SEPTEMBER 2013

Proyek Kemakmuran Hijau (GP) merupakan bagian dari Program *Millennium Challenge Corporation* (MCC) yang dirancang untuk mengurangi kemiskinan dengan mendorong pertumbuhan ekonomi. Proyek ini memberikan bantuan teknis untuk mendukung persiapan proyek, meningkatkan perencanaan penggunaan lahan, dan memperkuat kapasitas lokal dan regional untuk mewujudkan pembangunan rendah karbon.

The Green Prosperity (GP) Project was part of the Millennium Challenge Corporation (MCC) Program which was designed to reduce poverty by promoting economic growth. The project would also provide technical assistance to support project preparation, improve land use planning, and strengthen local and regional capacity to pursue low-carbon development.

PELATIHAN DAN PENINGKATAN KAPASITAS

TRAINING AND CAPACITY BUILDING

THE IMMERSION PROGRAM FOR INFRASTRUCTURE BUILDING AND IMPROVEMENT IN INDONESIA WITH ASIAN INFRASTRUCTURE CORPORATION (AIC) AND HITACHI CORPORATION

Peserta Program Immersion berasal dari Hitachi Group, Jepang dengan berbagai latar belakang pendidikan dan profesi. Program ini bertujuan agar perusahaan-perusahaan Jepang mampu melayani dengan baik terkait dengan pembangunan infrastruktur di negara-negara Asia dan meningkatkan taraf hidup masyarakat di kawasan tersebut. Selama program berlangsung, URDI secara aktif memberikan fasilitasi baik secara substansi maupun teknis kepada AIC.

The participants of this program came from Hitachi Group, Japan, with various education and professional background. The program aims to make Japanese companies able to serve well the infrastructure development needs in Asian countries and to improve people's lives in the region. During the program, URDI actively provided both substantive and technical facilitation to AIC.
